Contents Volume 58 1998

Volume 58 No. 1 October 1998

Obituary: Seikichi Izawa
S. Berg **1–4**

Minireviews

Protochlorophyllide photoreduction
N. Lebedev, M.P. Timko **5–23**

Diurnal rhythms in metabolism: A day in the life of a unicellular, diazotrophic cyanobacterium
L.A. Sherman, P. Meunier, M.S. Colón-López **25–42**

Regular papers

Combined fluorescence and photovoltage studies on chlorosome containing bacteria. *I. Whole cells of* Chloroflexus aurantiacus
K.A. Schmidt, H.-W. Trissl **43–55**

Combined fluorescence and photovoltage studies on chlorosome containing bacteria. *II. Whole cells and chlorosome-depleted membranes of* Chlorobium limicola
K.A. Schmidt, H.-W. Trissl **57–70**

Analysis of the chlorophyll biosynthetic system in a chlorophyll *b*-less barley mutant
A.B. Rudoi, R.A. Shcherbakov **71–80**

Studies of the location and function of isoprenoid quinones in chlorosomes from green sulfur bacteria
N.-U. Frigaard, K. Matsuura, M. Hirota, M. Miller, R.P. Cox **81–90**

CO_2 and O_2 dependence of PS II activity in C_4 plants having genetically produced deficiencies in the C_3 or C_4 cycle
J.P. Maroco, M.S.B. Ku, R.T. Furbank, P.J. Lea, R.C. Leegood, G.E. Edwards **91–101**

Technical communication

Measurements of the CO_2/O_2 specificity of ribulose 1,5-bisphosphate carboxylase/oxygenase by ^{31}P- and ^{1}H-NMR
Z.-Y. Wang, S. Luo, K. Sato, M. Kobayashi, T. Nozawa **103–109**

Volume 58 No. 2 November 1998

Regular papers

A sizeable decrease in the electric conductance of the thylakoid lumen as an early event during reaction center and Q cycle turnover
W.J. Vredenberg, J.F.H. Snel, J.H.A. Dassen **111–121**

***In situ* detection of heavy metal substituted chlorophylls in water plants**
H. Küpper, F. Küpper, M. Spiller **123–133**

15-*Cis*-carotenoids found in the reaction center of a green sulfur bacterium *Chlorobium tepidum* and in the Photosystem I reaction center of a cyanobacterium *Synechococcus vulcanus*
G.E. Bialek-Bylka, R. Fujii, C.-H. Chen, H. Oh-oka, A. Kamiesu, K. Satoh, H. Koike, Y. Koyama **135–142**

Reversible phosphorylation and turnover of the D1 protein under various redox states of Photosystem II induced by low temperature photoinhibition
M. Salonen, E.-M. Aro, E. Rintamäki **143–151**

Metabolite control of *Sorghum* C_4 phospho*enol*pyruvate carboxylase catalytic activity and phosphorylation state
N. Bakrim, M. Nhiri, J.-N. Pierre, J. Vidal **153–162**

Action spectra and functional antenna sizes of Photosystems I and II in relation to the thylakoid membrane organization and pigment composition
V.A. Boichenko **163–174**

Activation of ribulose-1,5-bisphosphate carboxylase/oxygenase (Rubisco) with chimeric activase proteins
B.D. Esau, G.W. Snyder, A.R. Portis, Jr **175–181**

Voltammetric measurement of the plastoquinone redox state in isolated thylakoids
R.E. Cleland **183–192**

Biochemical and spectral characterization of the core light harvesting complex 1 (LH1) from the thermophilic purple sulfur bacterium *Chromatium tepidum*
I. Fathir, M. Ashikaga, K. Tanaka, T. Katano, T. Nirasawa, M. Kobayashi, Z.-Y. Wang, T. Nozawa **193–202**

Function of plastoquinones B and C as electron acceptors in Photosystem II and fatty acid analysis of plastoquinone B
J. Kruk, K. Burda, G.H. Schmid, A. Radunz, K. Strzałka **203–209**

Corrigendum: Volume 56: 95–102, 1998 **211**

Volume 58 No. 3 December 1998

Regular papers

Leaf anthocyanin content changes in *Zea mays* L. grown at low temperature: Significance for the relationship between the quantum yield of PS II and the apparent quantum yield of CO_2 assimilation
F. Pietrini, A. Massacci **213–219**

Location of the redox-active cysteines in chloroplast sedoheptulose-1,7-bisphosphatase indicates that its allosteric regulation is similar but not identical to that of fructose-1,6-bisphosphatase
R.P. Dunford, M.C. Durrant, M.A. Catley, T.A. Dyer **221–230**

Simultaneous detection of spin-coupled and decoupled Q_A^- EPR-signals in Photosystem II complexes isolated with isoelectric focusing
P. Geijer, S. Peterson, U. Härndahl, S. Styring, C. Sundby **231–243**

Relationship between thylakoid electron transport and photosynthetic CO_2 uptake in leaves of three maize (*Zea mays* L.) hybrids
H.J. Earl, M. Tollenaar **245–257**

Compensatory changes in Photosystem II electron turnover rates protect photosynthesis from photoinhibition
M.J. Behrenfeld, O. Prasil, Z.S. Kolber, M. Babin, P.G. Falkowski **259–268**

Thylakoid protein phosphorylation is suppressed by 'free radical scavengers'. Correlation between PS II core protein degradation and thylakoid protein phosphorylation
J.H. Georgakopoulos, J.H. Argyroudi-Akoyunoglou **269–280**

CO_2 gas exchange and phosphoenolpyruvate carboxylase activity in leaves of *Zea mays* L.
M. Pfeffer, M. Peisker **281–291**

Studies on photoacoustic uptake signals in tobacco leaves under high carbon dioxide levels
M. Havaux, S. Malkin **293–302**

Technical communication

Picosecond laser-fluorometer with simultaneous time and wavelength resolution for monitoring decay spectra of photoinhibited Photosystem II particles at 277 K and 10 K
A. Bergmann, H.-J. Eichler, H.-J. Eckert, G. Renger **303–310**

Book review **311–313**

Contents Volume 58 **315–317**

Author index Volume 58 **318**

Instructions for authors **319–324**
